

# MONIDOR

Easy IV Therapy With  
Remote Monitoring

# Monidrop<sup>®</sup> W

## INFUSION METER

Helps nurses to improve patient safety with better control over gravity-based intravenous therapy

### High quality

Small and accurate device

### Patient safety

With controlled IV therapy

### User friendly

Easy to set up, train and use

### Designed to fit

Suitable for many standard IV administration sets

# IV Screen™

Less stress, calmer nights at wards,  
fewer visits to isolation rooms

## Overview

IV Screen will show the status of all the infusions on the hospital wards

## Efficient

Saves nurses time and streamlines work-flow

## Less alarms

Notifications are given remotely which is especially beneficial at night

## Cost-saving

Nurses time-related and material savings

Enables a net profit that is 2,6  
times the cost of the solution\*
